Auditory Verbal UK is an award-winning national charity. We want all deaf babies and young children to have the opportunity to listen and speak as equals alongside their hearing peers. Our programme of auditory verbal therapy (AVT) coaches parents to enable their children to listen, talk and develop lifelong communication skills. Auditory Verbal UK also provides internationally accredited training for professionals working with children with a hearing loss. Registered Charity No: 1095133.

The Elizabeth Foundation is a national charity supporting infants and pre-school children with hearing loss and their families. It helps babies and children with all degrees of hearing loss learn to listen and speak. It does this by providing pre-school education services at its Family Centre in Portsmouth, as well as providing a national online interactive home learning programme and summer residential programme for those families living outside the south of England. Registered Charity No: 293835
